# QUICK GUIDE & TEMPLATES FOR PERFECT BUTTON DESIGN

## Important Design Notes

### Please Read Before Starting

- Do Not Resize the Template: This template is set to the exact dimensions needed for accurate production. Please do not stretch, shrink, or alter any elements within the template itself.

- The Outer Black Line = The Edge of Your Button Face: Your background design must extend fully to this line to ensure seamless coverage and avoid any unsightly white edges on your finished button.

### Bleed Line (Outer Circle)
  - Action: Extend your background colors, patterns, or images fully to this outer edge.
  - This extra area ensures your button has full color to the edge after trimming, preventing any white borders. This is all setup for you in our design templates.

### Finished Button Size (Middle Circle)
  - Note: This circle represents the final cut size of your button.

### Safe Zone (Inner Circle)
  - Action: Keep all critical elements (such as text, logos, and main images) inside this area.
  - This ensures important details are not cut off or wrapped around the button's edge during manufacturing.

## Background Design Tips

- To change your button's background color, simply extend your desired color or image all the way to the Bleed Line.
- It is normal for some of your background color (or white space) to slightly border your inner design or main image. This is a standard part of the printing process to ensure full coverage.

## File Setup Guidelines

- File Format: Please submit your artwork as a high-quality PNG, JPG, or PDF. Vector files (such as SVG, AI, or EPS) are preferred for optimal print results.

## Choose Your Design Option

Option 1: Design in Canva (Recommended for Ease of Use)
- Click here to open and design directly in Canva

Option 2: Use Your Own Design Software
- Download the blank template image below and overlay your design using your preferred software (e.g., Adobe Photoshop, Illustrator, GIMP).

## Submitting Your Finished Design

1. Save your completed design as a high-quality PNG, JPG, or PDF.
2. Name your file clearly: For example, MyDesign_CustomButton.png
3. Send your design to: sales@dasc-ns.ca
